

Flu Season is now upon us...

In order to protect yourself, your family and your co-workers, you want to be sure to stay hydrated this Fall and Winter. mr.H₂O offers a range of products to deliver fresh, clean water that tastes great and is more convenient than traditional bottled water.

You wouldn't
do this

So why allow
that ?

Sanitary tips for any office cooler

Regardless of whether you use our products or a competitor's, observing the following tips may help you avoid getting sick unnecessarily:

- One of the most common ways people catch colds and the flu is by rubbing their nose or their eyes after their hands have been contaminated with a virus.
- Do not reuse your own personal water bottle unless it is a large mouth bottle or a bottle opening that never comes in contact with your lips!
- Never touch the cooler water spigot opening with your hands or water bottle!
- Wash and/or sanitize your hands frequently throughout the day.

mr. H₂O Water Bottles

- Place sanitizing wipes and/or hand sanitizer near office equipment like coolers, fax and copy machines.

\$9.25
100 ml.

CoolerClean® Spray

has been developed specifically to hygienically clean the outside contact points of the water cooler. Spray once into each faucet daily for optimal results.

Safe, Simple and Effective.

CoolerClean is a product that consists of harmless ingredients and is FDA approved. We recommend that you place a bottle at every water cooler.
